Turning the Wheel

Turning the World Toward New Possibilities

Stardust and Water is a biographical stage dream that brings two evenings of wildly innovative art to the community, while nourishing healthy community connection in the process. It is a multimedia feast, a synthesis of performance art disciplines including dance, theater, live music, song, spoken word, and 3D original film that surrounds the dancers.

Join a diverse cast of forty collaborating artists and Orcas community members. Director Alana Shaw, has been serving youth and their mentors across the country for over 35 years through her non-profits arts organization, Turning the Wheel Productions.

Guided by open improvisational forms participants create choreography and text based on their own stories, histories, and physical abilities. We incorporate these creations into the performance.

The cast includes folks of all ages, folks who have never performed before, and folks who are professional actors and dancers all mixed together in a seamless intersection of life and art, authenticity and professionalism.
